| **Batch No :** | **: 51** |
| **Date** | **: 13/03/26** |

## Task 1 – Image Gallery Website

### Prompt:

Create an image gallery web page.

### Requirements:

• Display images in a grid layout.

• Use AI to:

- Optimize layout using CSS Grid.
- Add hover zoom or overlay effects.
- Ensure mobile responsiveness.

### Code:

index.html > ...

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Image Gallery</title>
    <link rel="stylesheet" href="styles.css">
</head>
<body>
    <h1>Image Gallery</h1>
    <div class="gallery">
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=1" alt="Random Image 1">
            <div class="overlay">
                <p>Image 1</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=2" alt="Random Image 2">
            <div class="overlay">
                <p>Image 2</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=3" alt="Random Image 3">
            <div class="overlay">
                <p>Image 3</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=4" alt="Random Image 4">
            <div class="overlay">
                <p>Image 4</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=5" alt="Random Image 5">
            <div class="overlay">
                <p>Image 5</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=6" alt="Random Image 6">
            <div class="overlay">
                <p>Image 6</p>
```

```html
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=7" alt="Random Image 7">
            <div class="overlay">
                <p>Image 7</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=8" alt="Random Image 8">
            <div class="overlay">
                <p>Image 8</p>
            </div>
        </div>
        <div class="gallery-item">
            <img src="https://picsum.photos/300/200?random=9" alt="Random Image 9">
            <div class="overlay">
                <p>Image 9</p>
            </div>
        </div>
    </div>
</body>
</html>
```

## Output:

SR UNIVERSITY

# Task 2 – Profile Card Generator

**Prompt:** Create a profile card web page.

## Requirements:

• Display user image, name, role, and social media links.
• Use AI to:
- Suggest modern UI colors and fonts.
- Design the card using Flexbox.
- Add hover animation and shadow effects.

## Code:

profile.html > html

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Profile Card</title>
    <link href="https://fonts.googleapis.com/css2?family=Poppins:wght@300;400;600&display=
    <link rel="stylesheet" href="profile.css">
</head>
<body>
    <div class="profile-card">
        <div class="profile-image">
            <img src="https://picsum.photos/150/150?random=10" alt="Profile Picture">
        </div>
        <div class="profile-info">
            <h1 class="name">Kowshik</h1>
            <p class="role">Software Developer</p>
            <div class="social-links">
                <a href="#" class="social-link" data-platform="github">GitHub</a>
                <a href="#" class="social-link" data-platform="linkedin">LinkedIn</a>
                <a href="#" class="social-link" data-platform="twitter">Twitter</a>
            </div>
        </div>
    </div>
</body>
</html>
```

**Output:**

# Task 3 -Develop a dynamic shopping cart system.

**Prompt:** Create a shopping cart system.

## Requirements:

- Add, remove, and update product quantities.
- Display real-time total price.
- Use AI to:
  - Manage cart state using JavaScript objects.
  - Persist cart data in localStorage.

## Code:

cart.html > ...

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Shopping Cart</title>
    <link rel="stylesheet" href="cart.css">
</head>
<body>
    <h1>Shopping Cart System</h1>
    <div class="container">
        <div class="products">
            <h2>Products</h2>
            <div class="product-list">
                <div class="product" data-id="1">
                    <img src="https://picsum.photos/100/100?random=20" alt="Product 1">
                    <h3>Laptop</h3>
                    <p>$999.99</p>
                    <button class="add-to-cart">Add to Cart</button>
                </div>
                <div class="product" data-id="2">
                    <img src="https://picsum.photos/100/100?random=21" alt="Product 2">
                    <h3>Mouse</h3>
                    <p>$29.99</p>
                    <button class="add-to-cart">Add to Cart</button>
